

# TOXIC WASTE SLIME

## You will need:

1/2 cup hot water

1/2 teaspoon baking soda

1/2 cup clear Elmer's glue

1/2 tablespoon green glow powder

2-3 tablespoons of saline solution (with sodium borate and boric acid)

- Combine hot water and baking soda. Stir until baking soda dissolves.
- Add glue and mix well.
- Mix in glow powder.
- Add saline solution 1/2 tablespoon at a time until mixture takes on a ball like form.
- Knead slime until it becomes more solid. If it still sticks, add a teaspoon of saline solution until the mixture remains together.
- Charge slime under a light.
- Take slime to a dark room and watch it glow!
