

Staff at library to be commended

Dear Editor:

I am writing to you to share with the public the utmost admiration I have for the staff of the Charles County Public Library.

All our staff members have cheerfully worked long hours during the horrendous task of barcoding each and every book, audio tape, videotape and other items in our libraries.

The teamwork I have witnessed in each branch has been outstanding.

To give you some idea of the magnitude of this task, this project required the physical handling of each item in our collection

— sometimes by as many as four or five people — all in all, more than 350,000 items.

I would like to thank the many volunteers who came forth to help.

Without them, we could not have completed this job in a timely manner. To all of you who have helped, my eternal gratitude.

I am terribly proud of my staff, and you in Charles County are lucky to have so many people dedicated to serving your information needs.

Katharine C. Hurrey
Director, Charles County
Public Library

Help with school project

Dear Editor:

I am doing a project for school studying the state of Maryland. Would you print this and ask your readers to send me a post card from Maryland

and write a couple sentences with their favorite thing about the state?
