TO MAKE THIS BUTTERFLY CRAFT YOU WILL NEED

- Do A Dot Art! Markers
- Coffee filters
- Pipe cleaners
- Wooden clothespins
- Plastic spray bottle filled with water
- Tacky craft glue (optional)

DIRECTIONS FOR COFFEE FILTER BUTTERFLY CRAFT

After gathering supplies, invite kids to smooth a coffee filter over a plate, pie pan, or stack of newspapers. Invite kids to dab the coffee filter with Do A Dot Art! Markers.

Be sure to use a variety of colors! Don't you love how vibrant they are?

When kids are done dotting their coffee filter, invite them to spray water all over it. We sprayed our inside, but this part is also fun to do outside.

Allow the coffee filter to dry completely.

When the coffee filter is dry, scrunch the middle of it into a butterfly shape and secure with a clothespin. Cut a small length of pipe cleaner, then fold it into a V shape to make antennae for the butterfly. Slide the pipe cleaner into the clothespin.

If desired, secure the clothespin with a small dot of tacky craft glue.
